the Peace Conference.

President Wilson's trip abroad to attend the peace conference is a wise and appropriate undertaking. There are several reasons why he should be at hand.

In the first place, the German advances for peace have been made to him and presented to the Allies thru his agency.

In the second place, at the conference many questions will naturally ome up which will be subject to marked differences of opinion. The Allies, necessarily harmonious in time of war, may disagree in regard to the terms of peace. President Wilson's authority and personality are likely to be a strong factor in composing any such differences. The fact that America has nothing to ask for herself will strengthen his posi-

GERMS IN ITAL

Tuberculosis Experts Sent by Red Cross Will Use Latest Methods.

Included in the unit of medical and lay workers which the American Red Cross has sent to Italy are a number of the leading anti-tuberculosis workers of the country, sponsored by the National Tuberculosis Association. Dr. William Charles White, who heads the unit, is medical director of the Tuberculosis League of Pittsburgh, and Dr. Robert H. Bishop, the assist-ant director, is secretary of the Anti-Tuberculosis League of Cleveland as well as health commissioner of that city. Dr. John H. Lowman of Cleveland, a former president of the Na-tional Association, is another prominent member of the unit. Others are Dr. Robert G. Patterson, secretary of the Ohio Tuberculosis Association; Seymour H. Stone, until recently sec retary of the Massachusetts Anti-Tuberculosis League; Dr. Gertrude Sturgis, secretary of the New York City Association of Tuberculosis Clinics, and N. A. Nelson, superintendent of the Eincinnati Anti-Tuberculosis League.

These men and women, at the re-quest of the Italian government, will co-operate with that country in applying the latest approved American methods for combating the spread of tuberculosis. Some of them will be charged with the establishment of clinics where people of all ages may be examined and treated; others will devote their attention particularly to preventing tuberculosis among chil-dren, and a third group will develop health publicity and education.

It is to the credit of the anti-tuber-culosis campaign in America that it has produced specialists of such inter-national standing that Italy wishes to call them into her service temporarily. But the campaign will be continued unremittingly here at home. Its support during the ensuing year will be derived not as heretofore from the sale of Red Cross Christmas Seals, but by a special appropriation made by the Red Cross to the National Tuberculosis Association. Tuberculosis workers on their side will line up with the Red its Christmas

The following interesting letter as been received by Mr. and Mrs. L. E. Herron, from their son, J. Sterling Herron, who is seeing service in France, with the Marines, and will be read eagerly by his numerous friends here.

"At the Hospital." Dearest Mother:-

You have undoubtedly received the cablegram which the Red Cross lady promised to send you for me. I am doing well and still in the very best of spirits. Don't allow your imagination to run wild and to think of me as being badly shot up, for I am not, only slightly wounded. It think they are a fine kidney medihappened on the morning of Nov. 1st, while "going over the top". had advanced almost a half mile into the German lines when we encountered machine gun resistance and we were advancing to take them when I received my wound. A Red Cross man was right by me when it happened, and he dressed me up quickly -then some German prisoners, who were coming in fast, carried me over to the Field Hospital.

Mother, I am going to be a little more frank with you than usual in what I have been doing over here. First I think you should feel proud to know that I have been up against those who left their service to go to the "Heinies" on many occasions, and war did so with the assurance that to have did my bit each time, then be their positions would be open on their so lucky as to draw a slight wound. return. They have declared that to us with bloody hands up. You "of course" remember what I they are now ready to redeem their told you while at home about my retold you while at home about my returning from the service. Well its true, for victory will be ours in less than a month. I have lots to tell you when I return as I have seen lots and promises. Business asage often know quite a great deal about the war game, from actual experience. My division has been cited on four occasions for its besting the Heinies. For it was my outfit which received credit from the French government for stopping the Germans at Chateau Thierry in June, thus saving Paris. This was one of the hardest fights staged during the whole war-known as the 2nd Battle of the Marne. However, the French called it the Battle for Paris", adding of course a compliment to us. I am your loving son, "J".

The following letter was received Jesse A. Simpson, and will be very interesting to many of his friends and relatives in the county.

"League Island, aboard the Pennsylvania".

Dear Mother:

I take the pleasure of writing you a few lines to let you know I am well and happy and hope it finds all the Well I got my order to be ready to sail in 36 hour, and it was sure good news to me as I am anxious to make the trip, as I like this one much better than when I started to Siberia, as I got a letter from one of my friends and he said it was jumping off place of the world. You have heard talk of "Hog Island", I was there yesterday, and it sure has the right name, as they are sure hogish the way they are making ships

Mother, where is Bailey? Two of my last letters were returned from him. I suppose he has crossed the "faom". I am sure you are glad to think you have a son of 17 years of age in service for the world freedom, and I sure think it a great honor for any boy to take a gun upon his shoulders and march beside his brother.

Well Bryan Gastineau and I are still together, as he is going over but don't know what Naval Base he is to go in. Hope we can stay together.

Well it looks as if I am going to be gone for quite a while from the looks of the clothes I had to get yesterday. Will tell you a few things I have: 2 blankets, 3 pairs of shoes, 1 pair of gum boots, 4 blue serge suits, 5 white ones, 2 watch caps, 4 white hats, 1 blue hat, 12 pair of yarn socks, 4 suits of heavy underwear, 2 neckerchiefs, 1 dozen handkerchiefs, 2 pairs of yarn gloves, 2 sweaters, and 1 hammock, but am going to try and give it away and sleep on the deck. sometimes think the ship has hit mine as the 6-foot falls don't suit me. but I suppose I will get used to them. I am just about to forget to to tell you about my soap store, 8 bars of salt soap and two good scrub brushes. and I am the sailor that can use them as it would not do to give them away, as the skipper would soon tell you that the suit needs a drink, that sure

Give my best love to all and good luck to all, I am sure coming back to pen to me today. I found my half the "Land of the Free and the Home as I get in port as it may be some time . I have to bring this to a close as I have lots to do. I could tell you lots if I could see you. With a ship load of love and not a submarine in sight. Your loving son,

Renewed Testimony.

No one in Lancaster who suffers backache, headaches, or distressing uninary ills can afford to ignore this Lancaster man's twice-told story. It is confirmed testimony that no Lancaster resident can doubt.

W. C. Davis, tailor, Puplic Square, says: "Some time ago my kidneys were in bad condition. I suffered with pains across my back and thru my loins. My kidneys were irregular in action and I had to get many times at night to pass the kidney secretions. I had considerable stooping over to do and I became easily tired and languid. Doan's Kidney Pills brought relief and cine." (Statement given April 22, 1912.)

Christmas Red Cross Roll Call.

MacKenzie R. Todd of Frankfort, a man of wide acquaintance and large experience in handling such campaigns, who was selected to manage the Kentucky Division of the Red Cross Christmas Roll Call, and who has offices on the tenth floor of the Columbia Building, Louisville, is already getting the work in shape, determined to secure at least a million members in the State. To assist him in the great work the chapters of the Red Cross are appealed to and a manager has been selected in each of the one hundred and twenty counties, whose duty it will be to organize their localities and see that every one is given the opportunity to become a member of humanity's greatest cause. The plan is to sell memberships at \$1, the amount to go toward the support of the work at home and abroad. Each member will be given a button which will be a badge of honor, a service flag and a dozen Christmas seals, the sale of the seals being discontinued for the season. The week of December 16-23 has been selected for the final drive for universal membership in the organization to which the world owes so much and to which it is not only a duty to belong but the highest privilege. Let it be remembered that the campaign is not for money but memberships and that

It's Thumbs Down!

So far as America is concerned it is thumbs down for Germany until the peace conference has finally decided her fate.

Germany's friends in America must be made to realize this.

For already the German propagan dists are getting busy in her behalf. Now that the armistice has been signed, the war to all intents and purposes ended, they are talking sympathetically of the stricken father land.

 $_{\emptyset}$ Trying to sway public opinion in her behalf.

And it must be stopped.

Germany halted at nothing in her mad raid upon Europe. Every principle of humanity was tossed into the discard. No cruelty, no outrage, no form of destruction and devastation was too drastic. And in her methods of warfare she set a pace that horrified all civilization. And finally, when she was all in,

Pleading for mercy! It wasn't America's war. Of all It is creditable that the employers the nations involved America suffered the least. The appalling blood cost fell most heavily upon Europe. And the German fate will in the finality be decided at the European hands.

Germany knows this. Knows that she can hope for little mercy at European hands. But she is counting pathetic American public opinion.

But more she is counting upon her friends here to arouse that sympathy. Right now the American duty is to block this propaganda

To keep hands off and let Germany face her fate.

Those who wish may bring their Tobacco in, and if desired, receive a liberal advance on same.

We wish to thank the Growers for their liberal assurance to sell with us, and promise in return the best prices obtainable for their crops.

Be on the Lookout and Watch for the NEW FIRM.

FENNER & PITT

The Tobacco Growers Or 0 Madison, Garrard and Adjoining Counties:

As our policy has always been to look after the interest of the growers, and get them the high dollar for their tobacco, we have been unable to announce our opening sale, on account of the influenza prevalent in the South. We were however, advised by the big tobacco purchasing companies that as soon as they get buyers to the Lexington market, we would have themhere on the same day.

Remember the HOME HOUSE has never speculated in one pound of tobacco. We do a strictly commission business. We are for the grower first, last and all the time.

We have doubled our floor space and can now unload your tobacco the same day you come. We also have two of the largest buyers prizing on our floors.

We will announce our opening date as soon as the big companies can get through in the South. Don't be misled into taking your tobacco to a market where it will be sacrificed. For we know we will have buyers on the same day that Lexington or any other market in the state.

Hoping that none of the growers will be misled about the opening, or in thinking they will have a market at Lexington, or some other point, before ours, we remain, Very truly yours,

By W. E. LUXON and I. M. HUME. KENTUCKY.

RENEWS ITS WARNING AGAINST INFLUENZA.

Rapid Extension in Many Sections Following Peace Celebrations.

Free Vaccine For Prevention of the Disease.

Bowling Green, Ky., Dec. 6, 1918. To the Health Officials, Physicians and People:

Early in October, before the full import of the danger from influenza was grasped by the people, and well in advance of such action in most other states, churches, schools and all other places of public assembly were rigidly closed, and, with the aid of the public press, the State was flooded with warning and advisory literature, with the result that, in spite of the hardships inseparable from such drastic measures vitally affecting the most treasured customs and privileges of every community and home, there was such universal and helpful co-operation from the clergy, the teachers, women's clubs and the rank and file of the people, as to greatly restrict the spread of the disease, except in certain mining and other sections and homes where the housing conditions made it impossible to secure proper ventilation and prevent people so situated.

In response to the urgent calls of distress, mainly from such sections, within four weeks this board, the U. S. Public Health Service, the Kentucky Red Cross and the State Couneil of Defense, meeting weekly, and utilizing their respective auxiliary organizations in every county and community in collecting information vere sent to do relief work, often under difficulties and living conditions easier to imagine than describe. Except in such sections and in some of the wealthiest counties, where shortsighted, niggardly Fiscal Courts have always forced doctors to carry on health work at their own expense, or leave it undone, the epidemic was that it was thought safe to remove or greatly liberalize the quarantine restrictions from the jurisdictions first attached which had good health done in nearly all cities and in about two thirds of the counties.

Everything went well for a few says when, following the peace cele-Irations and similiar festivities, durported almost everywhere, until in upon this term. many counties the disease again assumed such an epidemic form that ten cent stores and department stores demands were constantly received during special sales and other hours sumed such an epidemic form that for a renewal of the restrictions, the of congestion, are constant sources local authorities often imposing them of danger in an epidemic like this, without waiting for advice. The Cause of the Spirit of Hatred In Germany

We have known the Germans who have settled among us as a kindly, patient, enterprising and inoffensive people. Such also was the estimate which most nations had formed of the German race. The atrocities which Germany committed in the war-its relapse into the cruelties of barbarism-have been the marvel of the world-impossible of belief until proved by unimpeachable testimony

The original cause of these cruelties was the spirit of hatred which the German government instilled indirected against England, was deco rated by the government, and the verses themselves were sung with ac same spirit was shown when the Ger man government struck a meda commemorating the destruction of the "Lusitania".

The evidence of hatred has been notably absent from the French arm ies. France has suffered more crue! ly from the war than any other of th allied nations, but we read that her soldiers as a rule have showed much kindness toward German prisoners.

We trust that our young men wil old the same humanity in their hearts-that as our president has always done, they will discriminate carefully between the cruel and auto cratic German government and the nisled people who obeyed and trust

We shall look for our boys to come ome with just indignation, indeed, toward the German war-time excesse and cruelties, but with only sympathy in their hearts for the German civilian and peasant classes, who have suffered much in the years of war.

FARM

Return Money Invested More Quickly Than Any Other Farm Animals
Except Poultry.

(Prepared by the United States Department of Agriculture.)
No branch of live stock farming gives better results than the raising of well-bred swine when conducted with a reasonable amount of intelli-gence. The hog is one of the most important animals to raise on the farm, either for meat or for profit, and no farm is complete unless some hogs are kept to aid in the modern method of farming. The farmers of the South and West, awakening to the merits of the hog, are rapidly increasing their output of pork and their bank acless equipment, less capital, and makes greater gains per hundred pounds of concentrates than any other farm ani-mal, and reproduces himself faster and in greater numbers; and returns the money invested more quickly than any other farm animal except poultry.

the trucking and mixed-farming sections of the United States hogs are

used to consume various unmarketable substances. The value of milk is known on every farm although it may not be fully appreciated, and any one who has fed pigs knows the keen appetite they have for milk and its products. In the neighborhood of many large dairies pork production has become a very prominent and lu-crative supplement to the dairy industry. The hog is also a large factor in cheapening the production of beef. Hogs are placed in the cattle feed lots to utilize the corn and other feeds which the cattle have failed to digest and which otherwise would be wasted. Hogs following steers in many cases have increased the profit per steer by \$6 to \$9. Farmers and hotel and restaurant owners are using kitchen refuse to produce salable pork. In fact, as a consumer of by-products the

However, this propensity in many instances is being taken unfair advantage of through ignorance and lack of care. Milk products, animal offal, etc., which contain disease germs, especially those of tuberculosis, are given to hogs. This practice not only pecially results in spreading disease but causes loss in the hogs themselves through condemnation at slaughter. All such products should be effectively sterilized before being fed.

VALUE OF ACRE OF ALFALFA

Result of Interesting Experiment Conducted on Kansas Agricultural College Farm.

Experiments conducted on the Kanshown that 170 pounds of green alfalfa, cut and fed in a dry lot, was equal to 100 pounds of corn. Six pounds of corn was necessary to produce a pound of pork, so the 170 pounds of alfalfa produced 162-3 pounds of pork. Esti-mating that during the season an acre of alfalfa will yield 20,000 pounds of green hay, this, if cut and fed green with corn, would make 2,000 pounds of Figuring this pork at the pre vailing price will give some idea of the value of an acre of alfalfa.

CARGO OF SUPPLIES GCES TO ARCHANGEL

Red Cross Sends Relief Ships for Allied Soldiers and Civilians in, Starving Russia.

A relief ship was recently sent from this country to Archangel by the American Red Cross with 4,600 tons of drugs, food, soap and other supplies for the use of the Allied soldiers and needy civilians in that part of Russia. The vessel's cargo was valued at \$1,511,233.

Later, another ship was dispatched carrying 200 tons of similar supplies furnished by the American Red Cross. the total expenditure for the two shipments amounting to over \$2,000,000.

Major C. T. Williams of Baltimore was in charge of the party of thirteen which accompanied the shipment from this country. He was formerly a mem-ber of the Red Cross Commission for Roumania. Major Kirkpatrick, at one time a member of the latter commission, but recently attached to the Army Medical Corps, heads the medi-cal end of the Archangel expendition. Drugs and general hospital supplies constituted the greater part of the cargo sent from America.

While the chief concern of the ex-pedition was providing comforts for American and Allied fighting men in that part of the world, all efforts were bent to get relief to the Russian soldiers who were returned from Ger-man prison camps at the rate of about 15,000 a week. The condition of these men was pitiable. It has been esti-mated that 90 per cent. of them were

tubercular.
In addition to drugs and food, almost every imaginable article on the list of supplies sent over was for the comfort, convenience and pleasure of the Allied soldiers. Just a few of these articles were playing cards, razor bases, ukales accordeons, ukales, skates, razor blades, jewsharps, mandolins, razor blades, jewslarps, habonographs, accordeons, ukaleles, phonographs, cameras, skates, wigs, whiskers, grease paints, footballs, snowshoes, slippers, hockey outfits, Indoor baseballs, moving picture outfits, Bibles, prayer books, boxing gloves, games, music, books, cigarettes, candy and dried fruits.

The need of prompt relief for the inhabitants of towns along the coast of the White Sea and on the Kola peninsula, many of whom were facing starvation, was found to be imperative. Scurvy had broken out among the people at these places, adding to the general distress.

The towns to which the relief expendition was sent are virtually iso-lated from the outside world because of the treacherous coast line, shifting sand bars and uncharted waters. exceptionally early frost, even for that part of the world, ruined the harvests, which were expected to improve con-ditions. Statements, printed in Rus-sian, explaining the work of the Red Cross, were distributed among the in-

CLUBS AID FEEDING METHODS

Very Noticeable Changes Have Come About as Result of Demonstrations by Members.

(Prepared by the United States Department of Agriculture.)
One of the outstanding effects of the boys and girls' pig club work is the improvement in feeding methods employed by adults who have followed the lead of some club member. Even in the leading hog-producing states, where the quality of the hogs is high. very noticeable changes in feeding practices have come about as the result of the demonstrations made by club members.

In some instances it has been the ase of a self-feeder for fattening hogs by a club member that was the means of causing the farmers of that community to adopt the same method. In other sections the use of a balanced ration by a club member caused the farmers in his neighborhood to realize that corn alone is a poor and expensive hog feed, or that grazing crops or good pastures are essential to economi-cal gains on swine. In one county in Kentucky the pig-club demonstrations were the means of increasing the use of tankage, as a supplement to corn. from two tons to 75 tons per year in two years' time. In Alabama the pigdub agent obtained a pound of rape seed for each member who made a preliminary report on his or her pig. result of this small beginning one store in one county sold over 1,000 pounds of rape seed that fall and 1.500 pounds the following spring, and now that county is green with grazing rops for hogs. Since rape has made place for itself in that county, the ise of soy beans, cowpeas, velvet beans, etc., is now being pushed. Similar results, though perhaps less striking, have been obtained in other states. Sixty-one per cent of the members who completed their work last year report he use of grazing or pasture crops. The demonstrations by the boys are

ACROSS THE ROOF

By JACK LAWTON. 50,000,000,000,000,000,000,000,000

High up, at the back of the shabby old mansion, Dora began her career as an artist. And when the big rented room seemed unusually bare, Dora, with her happy sanguine spirit, congratulated herself upon its 'sky-light.'
There were days, however, when the
skylightlight failed to compensate.

When these reflections threatened overcome her, Dora would arise briskly to light the rose shaded lamp which was her comfort.

"Silly," she would reprove herself, "glooming away, while those same young people are envying your appar-ent royal road to fame and fortune; you should be grateful, my dear, grateful as can be, that you can sell sketches enough to almost pay your lodging."

Dora did not mention payment of ood. Sometimes Dora's food was not worth mentioning. Paper hag meals as a rule, when she finished her drawings; a dinner or two as celebration when the checks came in. And so, working feverishly, saving much heating, saving altogether too much food, it was not strange that the ambitious girl awakened one morning to find herself ill, on the camouflaged bed. which passed day times as a gorgeous

her window, came a stream of light from an opposite apartment.

Dera liked to look into the brilliant rooms of this luxuriously appointed apartment building towering above the old shabby house. Almost it was like gazing upon the stage of a theater. gazing upon the stage of a theater, gaily dressed women passing to and fro, men too, idling about the long, smoking room. One who came and went among them had the appearance

of a distinguished actor.

Dora liked his fresh fine youthful face beneath its crown of strangely white hair.

Anxiously the dog's moist nose sniffed inquiringly at her white outstretched arms, once or twice an eager tongue lapped at her unresponsive face, then back over the sill and across the roof rushed the furry body.

The handsome man of the white hair had just settled himself for an evening smoke. Before lowering the window shade he had looked across the roof toward a window that was in his chair it was as with an air of

disappointment.
"You rascal," he greeted the dog which scrambled panting to his knee, "playing truant again, eh?"

But Fluff was in no mood for pet-ing. Fiercely she caught at the man's sleeve, running a few steps from him she barked back appealingly.

"What the dickensman, it was evident that the dog was entreating him to follow.

"Oh!" she murmured, "you came for your dog. He visits me sometimes. You don't mind?"

The man smiled down upon her. "He was even nicer," Dora considered, "when he smiled." It was strange

that she had learned his face so well. She was sure that she could sketch from memory its every line.

"I did not come for the dog," David Wilton said gently. "I came for you. I have a mother over in that building who has only Fluff upon which to lavish her care. It strikes me that you need some care yourself. My mother will delight in giving it."

Suddenly stooping he lifted Dora's light weight in his arms. Before the roof door of the apartment building he

The Challenge

Most of us are good people. We admit it. If we weren't, we wouldn't admit it as often as we do. The trouble is to get other people to believe it.

When a man has had a first-class opportunity of profiting by sinister practices and hasn't taken advantage of it he doesn't need to toot his horn. His record does that for him.

Your Uncle Sam is in the position of that gentleman. He has had many a chance of territorial expansion at the expense of weaker neighbors, and has turned it down. He isn't perfect, but his record is pretty good, and it will help him at the peace conference. Not many of the conferees will attend with as clear a
